

What is the output of the following code?

```
public class CodingNinjas {  
  
    public static void main(String[] args) {  
        String str = "Coding Ninjas";  
        int len = str.length();  
  
        System.out.println(str.charAt(len));  
    }  
}
```

Options:

- ☐ s
- ☐ Compile Error
- ☒ Runtime error
- ☐ None of these

 Correct Answer

What is the output of the following code?

```
public class CodingNinjas {  
  
    public static void main(String[] args) {  
        String str1 = "Coding";  
        int len = str1.length();  
  
        String str2 = "";  
        while (len > len / 2) {  
            len--;  
            str2 += str1.charAt(len);  
        }  
  
        str1 = str1.toUpperCase();  
        str2 = str2.toLowerCase();  
  
        String str = str1 + str2;  
  
        if(str.contains("NGgn")) {  
            str += "Ninjas";  
        }  
  
        str = str.toLowerCase();  
        System.out.println(str);  
    }  
}
```
