What is the return type of a method that doesn't return any value?

Options:

○ int

○ float

◉ void

○ double

✓ Correct Answer

What is the output of the following code?

```java
public class Solution {

    public int getSum(int a, int b) {
        int sum = a + b;
    }

    public static void main(String args[]) {

        Solution obj = new Solution();
        System.out.println(obj.getSum(10, 20));
    }
}
```

Options:

○ 30

○ Runtime error

◉ Compilation error

○ None of the above

✔ Correct Answer

What is the output of the following code?

```java
public class Solution {

    public String getSum(int a, int b) {
        int sum = a + b;
        return sum;
    }

    public static void main(String args[]) {

        Solution obj = new Solution();
        System.out.println(obj.getSum(10, 20));
    }
}
```

Options:

○ 30

○ Runtime error

◉ Compilation error

○ None of the above

✓ Correct Answer

What is the output of the following code?

```java
public class Solution {

    public int getSum(int a, int b) {
        int sum = a + b;
        return sum;
